

SELF-CONSUMPTION PHOTOVOLTAIC INSTALLATION

CLEAN ENERGY,
RENEWABLE AND SUSTAINABLE

- 1800 m2 of photovoltaic panels.
- 507 000 kWh/year of planned production.
- 72% of self-consumption use.
- 15% of electricity consumption.
- 199 tons per year of CO2 reduction, equivalent to planting 660 trees

7 AFFORDABLE ENERGY
AND NON-POLLUTING

12 PRODUCTION AND CONSUMPTION
RESPONSIBLE

13 ACTION
FOR THE CLIMATE

Project included in the incentive program linked to self-consumption and storage, with renewable energy sources, within the framework of the Recovery, Transformation and Resilience Plan, financed by the European Union – NextGenerationEU

Program 2: self-consumption installations, with renewable energy sources, in other productive sectors of the economy outside the service sector, with or without storage.

Beneficiary: AYMAR, S.A.U

Total investment: 267.808,45€

Amount of aid: 66.952,11€

Power (kW): 377,19kWp

Royal Decree 477/2021
